Full-stack developer with 5+ years building scalable platforms used internationally, now focused on AI-assisted development and shipping production web apps with Next.js, TypeScript, and LLM-powered features.

WORK EXPERIENCE

Umain

Full-stack Developer

February 2025 - Present

- Build and ship full-stack web applications for clients using **Next.js, React, TypeScript, Supabase/Postgres, and Vercel**.
- Design and ship **LLM-powered product features** — integrating Claude and other models into client applications for natural-language workflows, automation, and document processing.
- Drive **AI-assisted development** across the team using Claude Code and agentic tooling (custom MCP servers, automated workflows, and hooks) to accelerate delivery and raise code quality.
- Built a logistics/transport operations platform end-to-end: role-based workflows, a Postgres/PostgREST data layer, custom PDF document generation, and deployment to on-site hardware at physical terminals.

Norwegian Red Cross

Full-stack Developer

December 2021 - January 2025

- Developed, maintained, and scaled **Nyss**, the Red Cross' in-house software platform, using **React, .NET, Azure (Functions, IoT Hub, Analytics, Microservices, DevOps), SQL, and Entity Framework**.
- Designed and shipped features that enabled efficient deployment of the platform to new countries, expanding reach to **12 national societies**.
- Provided technical support and bug fixes for partner national societies while implementing new features to improve scalability.
- Gained project-management experience by coordinating pro bono contributions from external consulting firms.

Finway Tech

Front-end Developer

March 2021 - May 2021

- Built order/invoice synchronization between suppliers and webstore admins and shipped responsive admin-panel features using **Svelte, React, TailwindCSS, and the Swagger API**.

EDUCATION

Universiteit Leiden

Bachelor of Science / International Relations & Organisations

August 2018 - December 2020

- Self-taught programming alongside the degree, leading to a career switch into software development.
- Represented Indonesia at **Harvard Model United Nations (HNMUN)**; nominated as one of the best public speakers in a 200+ delegate committee.

PROJECTS

Life Calendar

2026

Self-hostable life visualizer with pluggable importers (Strava, Apple Photos, Google Timeline, flights) feeding a unified events store with map, heatmap, and stats views. TypeScript, Elixir, Postgres.

Pulse

2026

App to visualize your entire music listening history — cleaned, organized, and continuously updated. Next.js, Dockerized. Live at pulse.tordar.no.

AI Daily

2026

Lightweight AI-news aggregator that auto-updates via scheduled Claude agents. Built with Astro. Live at ai-daily.dev.

SKILLS

Languages: TypeScript, JavaScript, C# / .NET, SQL, HTML/CSS

Frontend: React, Next.js, Svelte, TailwindCSS, SASS

Backend & Cloud: Node.js, Azure (Functions, IoT Hub, DevOps), Supabase/Postgres, Entity Framework, Vercel, REST APIs

AI & Tooling: Claude / LLM integration, Claude Code, AI-assisted development, MCP, Git
